What is Darwin's Theory of Evolution? - What is Darwin's Theory of Evolution? 2 minutes, 28 seconds - The theory of evolution by natural selection was first formulated in **Darwin's**, book "On the Origin of Species" in 1859. It describes ...

The theory of evolution by natural selection was first formulated in Darwin's book "On the Origin of Species" in 1859.

Natural selection is often described as survival of the fittest, where fitness refers to the ability to survive and reproduce.

Natural selection can change a species in small ways, such as causing a population to change color or size over the course of generations.

There is also a form of natural selection that depends on an organism's success at attracting a mate, a process known as sexual selection.
