Cheetah is the fastest animal on Earth

They have long black lines from their eyes to their mouth, called tear lines.

They usually hunt smaller prey. But, when hunting in groups they are capable of hunting larger prey, too.

Cheetahs do not eat humans.

The long tail aids the cheetah in steering and changing direction while running

Cheetahs have served as hunting pets of humans from about 3,000 BC. Today, it is illegal to have this animal as a pet in several countries.

But, they are threatened by several factors such as habitat loss, conflict with humans, and poaching
