Pentamirror

Reference for Dummies, 2006, page 106. Paul R. Yoder. Opto-Mechanical Systems Design, 2005, page 435. Understanding Viewfinders Photo of a Canon 400d pentamirror - A pentamirror is an optical device used in the viewfinder systems of various single-lens reflex cameras instead of the pentaprism. It is used to reverse again the laterally reversed image coming from the reflex mirror.

Instead of the solid block of glass of the prism in pentaprism system, here 3 mirrors are used to perform the same task. This is cheaper and lighter, but generally produces a viewfinder image of lower quality and brightness.

This optical device is often (more precisely) referred to as roof pentamirror because of the roof-like ridge.

Lensbaby

2013-05-24. Sahlin, Doug (2011). Digital Landscape and Nature Photography For Dummies (1st ed.). Retrieved June 3, 2013. Elinor Stecker-Orel (2007-12-10). - Lensbaby is a line of camera lenses for DSLR and mirrorless cameras that combines a simple lens with a bellows/ball and socket mechanism for use in special effect photography. A Lensbaby can give effects normally associated with view cameras. The lenses are for use in selective focus photography and bokeh effects.
