Hensleigh (1855). "On Roots mutually connected by reference to the term Zig-zag". *Transactions of the Philological Society* (2). Wikimedia Commons has media related - A zigzag is a pattern made up of small corners at variable angles, though constant within the zigzag, tracing a path between two parallel lines; it can be described as both jagged and fairly regular.

In geometry, this pattern is described as a skew apeirogon. From the point of view of symmetry, a regular zigzag can be generated from a simple motif like a line segment by repeated application of a glide reflection.

Although the origin of the word is unclear, its first printed appearances were in French-language books and ephemera of the late 17th century.

In the Zig-Zag illusion, a magician divides an assistant into thirds, only to have them emerge from the illusion at the end of the performance completely unharmed.

It was invented in 1965 by magician Robert Harbin.

Harbin was frustrated by his illusions being pirated by other magicians, and this inspired him to publish the method in his book *The Magic of Robert Harbin* (1970). The book was limited to 500 copies, and owners of the book were granted permission to build or have built the Zig Zag Girl (or indeed any other of the items in the book). The rights to the book and the Zig Zag illusion were then in time passed to The Magic Circle in the wake of Harbin's death. The concept of dividing a lady assistant into two or three parts was something that Harbin experimented with throughout his career before creating his ultimate divide, the Zig Zag Girl. Evidence of his fascination with this concept of dividing an assistant can be found in his earlier publications; the closest relative to the Zig Zag is the "Little by Little" illusion, which was also explained in *The Magic of Robert Harbin*.

Art Deco

in the bold geometric forms of the Vienna Secession and Cubism. From the outset, Art Deco was influenced by the bright colors of Fauvism and the Ballets - Art Deco, short for the French *Arts décoratifs* (lit. 'Decorative Arts'), is a style of visual arts, architecture, and product design that first appeared in Paris in the 1910s just before World War I and flourished internationally during the 1920s to early 1930s, through styling and design of the exterior and interior of anything from large structures to small objects, including clothing, fashion, and jewelry. Art Deco has influenced buildings from skyscrapers to cinemas, bridges, ocean liners, trains, cars, trucks, buses, furniture, and everyday objects, including radios and vacuum cleaners.

The name Art Deco came into use after the 1925 *Exposition internationale des arts décoratifs et industriels modernes* (International Exhibition of Modern Decorative and Industrial Arts) held in Paris. It has its origin in the bold geometric forms of the Vienna Secession and Cubism. From the outset, Art Deco was influenced by the bright colors of Fauvism and the Ballets Russes, and the exoticized styles of art from China, Japan, India, Persia, ancient Egypt, and Maya. In its time, Art Deco was tagged with other names such as *style moderne*, *Moderne*, *modernistic*, or *style contemporain*, and it was not recognized as a distinct and homogeneous style.

During its heyday, Art Deco represented luxury, glamour, exuberance, and faith in social and technological progress. The movement featured rare and expensive materials such as ebony and ivory, and exquisite craftsmanship. It also introduced new materials such as chrome plating, stainless steel, and plastic. In New York, the Empire State Building, Chrysler Building, and other buildings from the 1920s and 1930s are monuments to the style. The largest concentration of art deco architecture in the world is in Miami Beach, Florida.

Art Deco became more subdued during the Great Depression. A sleeker form of the style appeared in the 1930s called *Streamline Moderne*, featuring curving forms and smooth, polished surfaces. Art Deco was an international style but, after the outbreak of World War II, it lost its dominance to the functional and unadorned styles of modern architecture and the International Style.

It was opened by the not-for-profit Zig Zag Railway Co-op as an unpaid volunteer-staffed heritage railway in October 1975, using the alignment of the Lithgow Zig Zag line that formed part of the Main Western line between 1869 and 1910. The line climbs the western flank of the Blue Mountains, using railway zig zags to gain height.

Operation of the heritage railway was suspended in 2012 following accreditation issues with the Government of New South Wales. The railway was aiming to resume services in October 2013, but was then severely damaged during the 2013 NSW bushfires and then subsequently by torrential rain. Repairs and trials of restored rail vehicles and track commenced in August 2016 and it was planned to re-commence limited heritage operations in 2019, until the 2019–2020 bushfires damaged key infrastructure. The COVID-19 pandemic further delayed restoration. Heritage train services resumed on 27 May 2023.
