Wives and concubines were frequently acquired from conquered territory, and, in the case of Genghis Khan, sometimes whole empires, and the women enrolled as either his wives or concubines were often princesses or queens that were either taken captive or gifted to him.

Genghis Khan gave several of his high-status wives their own ordos or camps to live in and manage. Each camp also contained junior wives, concubines, and even children. It was the job of the Kheshig (Mongol imperial guard) to protect the yurts of Genghis Khan's wives. The guards had to pay particular attention to the individual yurt and camp in which Genghis Khan slept, which could change every night as he visited different wives. When Genghis Khan set out on his military conquests, he usually took one wife with him and left the rest of his wives (and concubines) to manage the empire in his absence.

Genghis Khan

After spending most - Genghis Khan (born Temüjin; c. 1162 – August 1227), also known as Chinggis Khan, was the founder and first khan of the Mongol Empire. After spending most of his life uniting the Mongol tribes, he launched a series of military campaigns, conquering large parts of China and Central Asia.

Born between 1155 and 1167 and given the name Temüjin, he was the eldest child of Yesugei, a Mongol chieftain of the Borjigin clan, and his wife Hö'elün. When Temüjin was eight, his father died and his family was abandoned by its tribe. Reduced to near-poverty, Temüjin killed his older half-brother to secure his familial position. His charismatic personality helped to attract his first followers and to form alliances with two prominent steppe leaders named Jamukha and Toghrul; they worked together to retrieve Temüjin's newlywed wife Börte, who had been kidnapped by raiders. As his reputation grew, his relationship with Jamukha deteriorated into open warfare. Temüjin was badly defeated in c. 1187, and may have spent the following years as a subject of the Jin dynasty; upon reemerging in 1196, he swiftly began gaining power. Toghrul came to view Temüjin as a threat and launched a surprise attack on him in 1203. Temüjin regrouped and overpowered Toghrul; after defeating the Naiman tribe and executing Jamukha, he was left as the sole ruler on the Mongolian steppe.

Temüjin formally adopted the title "Genghis Khan", the meaning of which is uncertain, at an assembly in 1206. Carrying out reforms designed to ensure long-term stability, he transformed the Mongols' tribal structure into an integrated meritocracy dedicated to the service of the ruling family. After thwarting a coup attempt from a powerful shaman, Genghis began to consolidate his power. In 1209, he led a large-scale raid into the neighbouring Western Xia, who agreed to Mongol terms the following year. He then launched a campaign against the Jin dynasty, which lasted for four years and ended in 1215 with the capture of the Jin capital Zhongdu. His general Jebe annexed the Central Asian state of Qara Khitai in 1218. Genghis was provoked to invade the Khwarazmian Empire the following year by the execution of his envoys; the campaign toppled the Khwarazmian state and devastated the regions of Transoxiana and Khorasan, while Jebe and his colleague Subutai led an expedition that reached Georgia and Kievan Rus'. In 1227, Genghis died while subduing the rebellious Western Xia; following a two-year interregnum, his third son and heir Ögedei acceded to the throne in 1229.

Genghis Khan remains a controversial figure. He was generous and intensely loyal to his followers, but ruthless towards his enemies. He welcomed advice from diverse sources in his quest for world domination, for which he believed the shamanic supreme deity Tengri had destined him. The Mongol army under Genghis killed millions of people, yet his conquests also facilitated unprecedented commercial and cultural exchange over a vast geographical area. He is remembered as a backwards, savage tyrant in Russia and the Arab world, while recent Western scholarship has begun to reassess its previous view of him as a barbarian warlord. He was posthumously deified in Mongolia; modern Mongolians recognise him as the founding father of their nation.

Genetic descent from Genghis Khan

However, while many of Genghis Khan's agnates' resting places are known (e.g. Shah Jahan in the Taj Mahal), none of their remains have been tested to prove or disprove these theories and debate continues (see below).

The site remains undiscovered - The location of the burial place of Genghis Khan (died August 1227) has been the subject of much speculation and research. The site remains undiscovered, although it is generally believed that it is near the sacred mountain of Burkhan Khaldun in the Khentii Mountains. The Genghis Khan Mausoleum in modern-day Inner Mongolia is not his burial site according to the Munkhchuluun Family living in the mausoleum.

Mausoleum of Genghis Khan

The Mausoleum of Genghis Khan is a mausoleum dedicated to Genghis Khan, where he is worshipped as ancestor, dynastic founder, and deity. The mausoleum - The Mausoleum of Genghis Khan is a mausoleum dedicated to Genghis Khan, where he is worshipped as ancestor, dynastic founder, and deity. The mausoleum is better called the Lord's Enclosure (i.e. shrine), the traditional name among the Mongols, as it has never truly contained the Khan's body. It is the main centre of the worship of Genghis Khan, a growing practice in the Mongolian shamanism of both Inner Mongolia, where the mausoleum is located, and Mongolia.

The mausoleum is located in the Kandehuo Enclosure in the town of Xinjie, in the Ejina Banner in the city of Ordos, Inner Mongolia, in China. The main hall is actually a cenotaph where the coffin contains no body (only headdresses and accessories), because the actual tomb of Genghis Khan has never been discovered.

The present structure was built between 1954 and 1956 by the government of the People's Republic of China in the traditional Mongol style. It was desecrated and its relics destroyed during the Cultural Revolution, but it was restored with replicas in the 1980s and remains the center of Genghis Khan worship. It was named a AAAA-rated tourist attraction by China's National Tourism Administration in 2011.

Battle of the Kalka River

Asia, where they joined Genghis Khan. In 1219, in retaliation for the murders of his ambassadors, the Mongol Khan, Genghis Khan, invaded the Khwarezmian - The Battle of the Kalka River was fought between the Mongol Empire, whose armies were led by Jebe and Subutai, and a coalition of several Rus' principalities, including Kiev and Galicia-Volhynia, and the Cumans under Köten. They were under the joint command of Mstislav the Bold and Mstislav III of Kiev. The battle was fought on May 31, 1223 on the banks of the Kalka River in present-day Donetsk Oblast, Ukraine, and ended in a decisive Mongol victory.

Following the Mongol invasion of Central Asia and the subsequent collapse of the Khwarezmian Empire, a Mongol force under the command of prominent Mongol Noyans (generals) Jebe and Subutai advanced into Iraq-i Ajam. Jebe requested permission from the Mongol emperor, Genghis Khan, to continue his conquests for a few years before returning to the main army via the Caucasus. While waiting for Genghis Khan's reply, the duo set out on a raid in which they attacked the Kingdom of Georgia. Genghis Khan granted the duo permission to undertake their expedition, and after making their way through the Caucasus, they defeated a coalition of Caucasian tribes before defeating the Cumans. The Cuman Khan fled to the court of his son-in-law, Mstislav Mstislavich of Galicia, whom he convinced to help fight the Mongols. Mstislav the Bold formed an alliance of the Rus' princes including Mstislav III of Kiev.

The combined Rus' army defeated the Mongol rearguard at first. The Rus' pursued the Mongols, who were in a feigned retreat, for several days, which spread out their armies. The Mongols stopped and assumed battle formation on the banks of the Kalka River. Mstislav the Bold and his Cuman allies attacked the Mongols without waiting for the rest of the Rus' army and were defeated. In the ensuing confusion, several other Rus' princes were defeated, and Mstislav of Kiev was forced to retreat to a fortified camp. After holding out for three days, he surrendered in return for a promise of safe conduct for himself and his men. Once they surrendered, however, the Mongols slaughtered them and executed Mstislav of Kiev. Mstislav the Bold escaped, and the Mongols went back to Asia, where they joined Genghis Khan.

Batu was a son of Jochi, thus a grandson of Genghis Khan. His ulus ruled over the Kievan Rus', Volga Bulgaria, Cumania, and the Caucasus for around 250 years.

Chinggisids

the descendants of Genghis Khan, also known as Chinggis Khan, and his first wife Börte. The dynasty, which evolved from Genghis Khan's own Borjigin tribe - The Chinggisids were the descendants of Genghis Khan, also known as Chinggis Khan, and his first wife Börte. The dynasty, which evolved from Genghis Khan's own Borjigin tribe, ruled the Mongol Empire and its successor states. The "Chinggisid principle"—that only descendants of Genghis Khan and Börte could be legitimate rulers of the Mongol or

post-Mongol world—would be an important concept for centuries, until the fall of Kazakh Khanate, the last states ruled by Chinggisid monarchs, in 1847.

The Borjigin lineage, descendants of Kaidu, an early Mongol leader, were initially one of many clans inhabiting the Mongol heartland. Genghis Khan was born c. 1162, son of a Borjigit warrior named Yesügei, a member of the Qiyat sub-clan; over the next decades, he subjugated or killed all potential rivals, Borjigit or not. By the time that Genghis established the Mongol Empire in 1206, the only remaining Borjigit were the descendants of Yesügei. They formed the *altan uruq* (lit. 'Golden Family')—the only people allowed to rule in the empire. Of these, the descendants of Genghis and his first, primary wife Börte held the highest seniority; the Chinggisid Principle was that this particular lineage—the eponymous Chinggisids—were the only legitimate rulers. Mongol religious ideology held that the Chinggisids would eventually become rulers of the entire world.

Because of the Mongol conquests, the Chinggisids became the rulers of most of Eurasia, even after the Mongol Empire split into successor states: the Golden Horde, the Chagatai Khanate, the Ilkhanate, and the Yuan dynasty.

Ögedei Khan

Ögedei Khan (also Ögedei Khagan or Ogodei; c. 1186 – 11 December 1241) was the second khan of the Mongol Empire. The third son of Genghis Khan, he continued - Ögedei Khan (also Ögedei Khagan or Ogodei; c. 1186 – 11 December 1241) was the second khan of the Mongol Empire. The third son of Genghis Khan, he continued the expansion of the empire that his father had begun.

Born in c. 1186 AD, Ögedei fought in numerous battles during his father's rise to power. After being granted a large appanage and taking a number of wives, including Töregene, he played a prominent role in the Mongol invasion of the Khwarazmian Empire. When his older brothers Jochi and Chagatai quarrelled over strategies when besieging Gurganj, Genghis appointed Ögedei sole commander; his successful capture of the city in 1221 ensured his military reputation. He was confirmed as heir after further infighting between his elder brothers led to both being excluded from succession plans. Genghis died in 1227, and Ögedei was elected as khan in 1229, after a two-year regency led by his younger brother Tolui.

As khan, Ögedei pursued the expansionist policies of his father. He launched a second invasion of Persia led by Chormaqan Noyan in 1230, which subdued the Khwarazmian prince Jalal al-Din Mangburni and began to subjugate Georgia. He initiated the Mongol invasions of Korea in 1231 and completed the Mongol conquest of the Jin dynasty in 1234, and his armies skirmished with the Song dynasty and in India. By the time of his death in 1241, large armies under the command of his nephew Batu Khan and Subutai had subdued the steppes and penetrated deep into Europe. These armies defeated Poland at Legnica and Hungary at Mohi before retreating. It is likely that this retreat was caused by the need to find a successor after Ögedei's death, although some scholars have speculated that the Mongols were simply unable to invade further because of logistical difficulties.

As an administrator, Ögedei continued to develop the fast-growing Mongol state. Working with officials such as Yelü Chucai, he developed *ortogh* trading systems, instituted methods of tax collection, and established regional bureaucracies which controlled legal and economic affairs. He also founded the Mongol capital city, Karakorum, in the 1230s. Although historically disregarded in comparison to his father, especially on account of his alcoholism, he was known to be charismatic, good-natured, and intelligent. He was succeeded by his son Güyük.
