HR 8799

HR 8799 is a roughly 30 million-year-old main-sequence star located 133.3 light-years (40.9 parsecs) away from Earth in the constellation of Pegasus. - HR 8799 is a roughly 30 million-year-old main-sequence star located 133.3 light-years (40.9 parsecs) away from Earth in the constellation of Pegasus. It has roughly 1.5 times the Sun's mass and 4.9 times its luminosity. It is part of a system that also contains a debris disk and at least four massive planets. These planets were the first exoplanets whose orbital motion was confirmed by direct imaging. The star is a Gamma Doradus variable: its luminosity changes because of non-radial pulsations of its surface. The star is also classified as a Lambda Boötis star, which means its surface layers are depleted in iron peak elements. It is the only known star which is simultaneously a Gamma Doradus variable, a Lambda Boötis type, and a Vega-like star (a star with excess infrared emission caused by a circumstellar disk).

Toyota C-HR

The Toyota C-HR (Japanese: ??? C-HR, Hepburn: Toyota Sh?eichi?ru) is a subcompact crossover SUV manufactured and marketed by Japanese automaker Toyota - The Toyota C-HR (Japanese: ??? C-HR, Hepburn: Toyota Sh?eichi?ru) is a subcompact crossover SUV manufactured and marketed by Japanese automaker Toyota since 2016. Since 2020, it is positioned between the Yaris Cross and Corolla Cross in Toyota's crossover SUV range.

The first-generation C-HR was available in many regions, including Japan, China, North America, Europe, Southeast Asia, and Australasia, and was produced in four countries. Since the release of the second-generation C-HR in 2023, availability of the C-HR has been limited to Europe and Australia, with production centralised in Turkey. The Corolla Cross, released in 2020, has largely taken over the model's positioning outside Europe.

Honda HR-V

The Honda HR-V is a subcompact crossover SUV (B-segment) manufactured and marketed by Honda over three generations. The first generation HR-V, based on - The Honda HR-V is a subcompact crossover SUV (B-segment) manufactured and marketed by Honda over three generations.

The first generation HR-V, based on the Honda Logo, was marketed from 1999 to 2006 in Europe, Japan and select Asia-Pacific markets, in either three-door (1999–2003) or five-door (1999–2006) configurations — internally designated GH2 and GH4 respectively.

After a seven-year hiatus, Honda reintroduced the nameplate for the second generation HR-V, based on the third-generation Honda Fit. Production began in late 2013 for the Japanese domestic market as the Honda Vezel (Japanese: ????????, Hepburn: Honda Vezeru), while production started in 2015 for North America, Australia, Brazil and select Asian markets as the HR-V. Apart from Japan, the model is also sold as the Vezel in China.

For the third-generation model, the nameplate is split between two different vehicles, one for the global market (sold as the Vezel in Japan), and a larger model based on the eleventh-generation Civic destined for North America and China. The latter model is sold outside those markets as the Honda ZR-V.

According to Honda, the name "HR-V" stands for "Hi-rider Revolutionary Vehicle", while the name "Vezel" is coined from "bezel", the oblique faces of a cut gem, with the "V" for "vehicle".

Westland WS-51 Dragonfly

400 m) HR Mk.1 5,600 ft (1,700 m) HR Mk.3 7,000 ft (2,100 m) Best rate of climb HR Mk.1: 800 ft/min (4.1 m/s) at sea level Best rate of climb HR Mk.3: 1,000 ft/min - The Westland WS-51 Dragonfly helicopter was built by Westland Aircraft and was an Anglicised licence-built version of the American Sikorsky S-51.

H.R. (musician)

Paul D. Hudson (born February 11, 1956), known professionally as H.R. (Human Rights), is an American musician who leads the hardcore punk band Bad Brains - Paul D. Hudson (born February 11, 1956), known professionally as H.R. (Human Rights), is an American musician who leads the hardcore punk band Bad Brains, and is an instrumental figure in the development of the genre. His vocal delivery has been described as diverse, ranging from a rapid-fire nasal whine, to feral growling and screeches, to smooth near-crooning or staccato reggae rhymes. He has departed the band periodically to pursue solo efforts that are more inspired by reggae than Bad Brains' punk sound. He is the older brother of Bad Brains' drummer Earl Hudson.

HR 2562 B

of HR 2562's circumstellar disc—as of April 2023, it is one of only two known brown dwarfs to do so. Separated by roughly 20 astronomical units (3.0×10^9 km) - HR 2562 B is a substellar companion orbiting the star HR 2562. Discovered in 2016 by a team led by Quinn M. Konopacky by direct imaging, HR 2562 B orbits within the inner edge of HR 2562's circumstellar disc—as of April 2023, it is one of only two known brown dwarfs to do so. Separated by roughly 20 astronomical units (3.0×10^9 km) from its primary companion, HR 2562 B has drawn interest for its potential dynamical interactions with the outer circumstellar disc.

Keka HR

Keka HR is a software company that provides cloud-based human resource management and payroll automation software. It was founded by Vijay Yalamanchili - Keka HR is a software company that provides cloud-based human resource management and payroll automation software.

It was founded by Vijay Yalamanchili on July 21, 2014. The company is headquartered in Hyderabad, with operations in Singapore and the United States.

Ursa Minor

Spreckley, S.A.; Stevens, I.R. (June 2008). "Oscillations in β Ursae Minoris. Observations with SMEI". *Astronomy and Astrophysics*. 483 (#3): L43 – L46 - Ursa Minor (Latin for 'Lesser Bear', contrasting with Ursa Major), also known as the Little Bear, is a constellation located in the far northern sky. As with the Great Bear, the tail of the Little Bear may also be seen as the handle of a ladle, hence the North American name, Little Dipper: seven stars with four in its bowl like its partner the Big Dipper. Ursa Minor was one of the 48 constellations listed by the 2nd-century astronomer Ptolemy, and remains one of the 88 modern constellations. Ursa Minor has traditionally been important for navigation, particularly by mariners, because of Polaris being the north pole star.

Polaris, the brightest star in the constellation, is a yellow-white supergiant and the brightest Cepheid variable star in the night sky, ranging in apparent magnitude from 1.97 to 2.00. Beta Ursae Minoris, also known as Kochab, is an aging star that has swollen and cooled to become an orange giant with an apparent magnitude

of 2.08, only slightly fainter than Polaris. Kochab and 3rd-magnitude Gamma Ursae Minoris have been called the "guardians of the pole star" or "Guardians of The Pole". Planets have been detected orbiting four of the stars, including Kochab. The constellation also contains an isolated neutron star—Calvera—and H1504+65, the hottest white dwarf yet discovered, with a surface temperature of 200,000 K.

Toyota C-HR+

The Toyota C-HR+ is a battery electric compact crossover SUV (C-segment) manufactured by Toyota. The vehicle was unveiled in March 2025. It is expected - The Toyota C-HR+ is a battery electric compact crossover SUV (C-segment) manufactured by Toyota. The vehicle was unveiled in March 2025. It is expected to be released in Europe in late 2025. In North America, the vehicle is marketed simply as the Toyota C-HR. A Subaru version is marketed as the Subaru Uncharted.

Named after the smaller hybrid electric Toyota C-HR, the C-HR+ is a larger vehicle built on a separate e-TNGA platform shared with the bZ4X.

V/H/S (franchise)

V/H/S is an American horror anthology franchise that includes seven found footage films – with an eighth to be released in 2025 – two spin-off films, - V/H/S is an American horror anthology franchise that includes seven found footage films – with an eighth to be released in 2025 – two spin-off films, and one miniseries. Created from an original story idea by Brad Miska, the plot centers around a number of disturbing VHS tapes that are discovered by innocent viewers and the possessive influence of the videos over those who see them. Realized by a collaboration of various filmmakers and different casts, the installments are mostly standalone in nature, though recurring elements indicate the same fictional villain as the source for all of its videos.

The original film, V/H/S, received mixed reviews, but was praised for its implementation of found-footage filmmaking and diverse stories, and was a financial success. The next two films in the franchise were met with mixed to generally negative reviews, and were not as financially successful as the first. Though the second film, V/H/S/2, was a success with film critics, it did not earn as much at the box office as its predecessor. The third installment, V/H/S: Viral, was generally negatively received critically, and made even less at the box office than the previous film. Financial information has not been released for the remainder of the films in the franchise, but their critical reception has improved. The fourth film, V/H/S/94, received the most positive reviews of the franchise. The fifth film, V/H/S/99, received lower but still generally positive ratings. The sixth film, V/H/S/85, received generally positive reviews. The seventh film, V/H/S/Beyond, also received generally positive reviews.

The first spin-off film, SiREN, serves as a continuation of one of the segments from the first film. It was met with a general positive critical reception. The Snapchat released miniseries, titled V/H/S: Video Horror Shorts, received praise for its short-form format and expansion of the franchise to new media. The second spin-off film, Kids vs. Aliens, also served as a continuation of one of the segments from the second film. It was met with a mixed reception.
