

What Were The Twin Towers

World Trade Center (1973–2001)

the world's tallest twin towers until 1996, when the Petronas Towers opened. Each tower had a total mass of around 500,000 tons. The original World Trade - The original World Trade Center (WTC) was a complex of seven buildings in the Financial District of Lower Manhattan in New York City. Built primarily between 1966 and 1975, it was dedicated on April 4, 1973, and was destroyed during the September 11 attacks in 2001. At the time of their completion, the 110-story-tall Twin Towers, including the original 1 World Trade Center (the North Tower) at 1,368 feet (417 m), and 2 World Trade Center (the South Tower) at 1,362 feet (415.1 m), were the tallest buildings in the world; they were also the tallest twin skyscrapers in the world until 1996, when the Petronas Towers opened in Kuala Lumpur, Malaysia. Other buildings in the complex included the Marriott World Trade Center (3 WTC), 4 WTC, 5 WTC, 6 WTC, and 7 WTC. The complex contained 13,400,000 square feet (1,240,000 m²) of office space and, prior to its completion, was projected to accommodate an estimated 130,000 people.

The core complex cost about \$400 million (equivalent to \$2.31 billion in 2023). The idea was suggested by David Rockefeller to help stimulate urban renewal in Lower Manhattan, and his brother Nelson, then New York's 49th governor, signed the legislation to build it. The buildings at the complex were designed by Minoru Yamasaki. In 1998, the Port Authority of New York and New Jersey decided to privatize it by leasing the buildings to a private company to manage. It awarded the lease to Silverstein Properties in July 2001. During its existence, the World Trade Center symbolized globalization and the economic power and prosperity of the U.S. Although its design was initially criticized by New Yorkers and architectural critics, the Twin Towers became an icon of New York City. It had a major role in popular culture, and according to one estimate was depicted in 472 films. The Twin Towers were also used in Philippe Petit's tightrope-walking performance on August 7, 1974. Following the September 11 attacks, mentions of the complex in various media were altered or deleted, and several dozen "memorial films" were created.

The World Trade Center experienced several major crime and terrorist incidents, including a fire on February 13, 1975; a bombing on February 26, 1993; and a bank robbery on January 14, 1998, before the complex was destroyed by targeted terrorist attacks on September 11, 2001. On that day, al-Qaeda-affiliated hijackers flew two Boeing 767 jets, one into each of the Twin Towers, seventeen minutes apart; between 16,400 and 18,000 people were in the Twin Towers when they were struck. The fires from the impacts were intensified by the planes' burning jet fuel, which, along with the initial damage to the buildings' structural columns, ultimately caused both towers to collapse. The attacks killed 2,606 people in and around the towers, as well as all 147 on board the two aircraft (not including the 10 hijackers). Falling debris from the towers, combined with fires in several surrounding buildings that were initiated by falling debris, led to the partial or complete collapse of all the WTC complex's buildings, including 7 World Trade Center, and caused catastrophic damage to 10 other large structures in the surrounding area.

The cleanup and recovery process at the World Trade Center site took eight months, during which the remains of the other buildings were demolished. On May 30, 2002, the last piece of WTC steel was ceremonially removed. A new World Trade Center complex is being built with six new skyscrapers and several other buildings, many of which are complete. A memorial and museum to those killed in the attacks, a new rapid transit hub, and an elevated park have opened. The memorial features two square reflecting pools in the center marking where the Twin Towers stood. One World Trade Center, the tallest building in the Western Hemisphere at 1,776 feet (541 m) and the lead building for the new complex, completed construction in May 2013 and opened in November 2014.

Twin Towers 2

The Twin Towers II (also known as Twin Towers 2, New Twin Towers, World Trade Center Phoenix and Michael W. Diamond Twin Towers) was a proposed twin-towered - The Twin Towers II (also known as Twin Towers 2, New Twin Towers, World Trade Center Phoenix and Michael W. Diamond Twin Towers) was a proposed twin-towered skyscraper complex which would have been located at the World Trade Center site in Manhattan, New York City. The proposed complex would have replaced the former Twin Towers of the World Trade Center destroyed in the September 11 attacks, restoring the skyline of the city to its former state. The main design for the proposed complex would have included twin towers, nearly identical to the original North and South towers designed by Minoru Yamasaki, though it would feature 115 stories—5 floors taller than the originals, among other differences. Beside the towers, an above-ground memorial would have occupied the footprints of the original towers. The new site would also have featured three 12-story buildings, replacing the original 3, 4 and 5 World Trade Center. The complex was designed and developed by American architect Herbert Belton and American engineer Kenneth Gardner.

9/11: The Twin Towers

minute-by-minute account of what happened inside the Twin Towers of the World Trade Center in New York City during the September 11 attacks. In the United States it - 9/11: The Twin Towers (also billed as Inside the Twin Towers) is a movie based on the 9/11 attacks which uses re-enactments and computer-generated imagery to re-create a minute-by-minute account of what happened inside the Twin Towers of the World Trade Center in New York City during the September 11 attacks. In the United States it premiered on the Discovery Channel on 3 September 2006, narrated by Harry Pritchett. In the United Kingdom, it premiered on BBC One on 7 September 2006, narrated by Terence Stamp.

The film won the 2007 British Academy Television Craft Award for Sound Factual, and was nominated (but did not win) for Editing as well. It was also nominated for the 2007 Emmy for Outstanding Made For Television Movie.

Collapse of the World Trade Center

people at the site. Two commercial airliners hijacked by al-Qaeda members were deliberately flown into the Twin Towers of the complex, engulfing the struck - The World Trade Center, in Lower Manhattan, New York City, was destroyed after a series of terrorist attacks on September 11, 2001, killing almost 3,000 people at the site. Two commercial airliners hijacked by al-Qaeda members were deliberately flown into the Twin Towers of the complex, engulfing the struck floors of the towers in large fires that eventually resulted in a total progressive collapse of both skyscrapers, at the time the third and fourth tallest buildings in the world. It was the deadliest and costliest building collapse in history.

The North Tower (WTC 1) was the first building to be hit when American Airlines Flight 11 crashed into it at 8:46 a.m., causing it to collapse at 10:28 a.m. after burning for one hour and 42 minutes. At 9:03 a.m., the South Tower (WTC 2) was struck by United Airlines Flight 175; it collapsed at 9:59 a.m. after burning for 56 minutes.

The towers' destruction caused major devastation throughout Lower Manhattan, as more than a dozen adjacent and nearby structures were damaged or destroyed by debris from the plane impacts or the collapses. Four of the five remaining World Trade Center structures were immediately crushed or damaged beyond repair as the towers fell, while 7 World Trade Center remained standing for another six hours until fires ignited by raining debris from the North Tower brought it down at 5:21 p.m. the same day.

The hijackings, crashes, fires, and subsequent collapses killed an initial total of 2,760 people. Toxic powder from the destroyed towers was dispersed throughout the city and gave rise to numerous long-term health effects that continue to plague many who were in the towers' vicinity, with at least three additional deaths reported. The 110-story towers are the tallest freestanding structures ever to be destroyed, and the death toll from the attack on the North Tower represents the deadliest single terrorist act in world history.

In 2005, the National Institute of Standards and Technology (NIST) published the results of its investigation into the collapse. It found nothing substandard in the towers' design, noting that the severity of the attacks was beyond anything experienced by buildings in the past. The NIST determined the fires to be the main cause of the collapses; the plane crashes and explosions damaged much of the fire insulation in the point of impact, causing temperatures to surge to the point the towers' steel structures were severely weakened. As a result, sagging floors pulled inward on the perimeter columns, causing them to bow and then buckle. Once the upper section of the building began to move downward, a total progressive collapse was unavoidable.

The cleanup of the World Trade Center site involved round-the-clock operations and cost hundreds of millions of dollars. Some of the surrounding structures that had not been hit by the planes still sustained significant damage, requiring them to be torn down. Demolition of the surrounding damaged buildings continued even as new construction proceeded on the Twin Towers' replacement, the new One World Trade Center, which opened in 2014.

Twin Towers (professional wrestling)

The Twin Towers were a professional wrestling tag team in the World Wrestling Federation (WWF) from 1988 to 1990, consisting of Akeem and the Big Boss - The Twin Towers were a professional wrestling tag team in the World Wrestling Federation (WWF) from 1988 to 1990, consisting of Akeem and the Big Boss Man. They are best known for a main event feud with the Mega Powers.

Twin Towers (San Antonio Spurs)

"Twin Towers" The Twin Towers was the professional basketball duo of Tim Duncan and David Robinson, who played for the San Antonio Spurs of the National - The Twin Towers was the professional basketball duo of Tim Duncan and David Robinson, who played for the San Antonio Spurs of the National Basketball Association (NBA) from 1997 to 2003. Both players were selected first overall by the Spurs in the NBA draft; Robinson was selected in 1987 and Duncan was selected in 1997. Both spent their entire careers as Spurs, and they played together from 1997 to 2003. The Twin Towers were known for their scoring, for their stifling defense, and for helping lead the Spurs to NBA championships in 1999 and 2003.

Noida Supertech Twin Towers

The Apex Tower and Ceyane Tower, colloquially referred to as the Noida Supertech Twin Towers, were incomplete residential buildings in Sector-93A, Noida - The Apex Tower and Ceyane Tower, colloquially referred to as the Noida Supertech Twin Towers, were incomplete residential buildings in Sector-93A, Noida, Uttar Pradesh, India. The towers were part of real estate company Supertech Limited's Emerald Court residential complex. The Supreme Court of India upheld the original decision by the Allahabad High Court and ordered the buildings' demolition on 28 August 2022. They were the tallest structures in India to be voluntarily demolished.

Philippe Petit

between the towers of Notre-Dame Cathedral in Paris in 1971 and of Sydney Harbour Bridge in 1973, as well as between the Twin Towers of the World Trade - Philippe Petit (French pronunciation: [filip p?ti]; born 13

August 1949) is a French highwire artist who gained fame for his unauthorized highwire walks between the towers of Notre-Dame Cathedral in Paris in 1971 and of Sydney Harbour Bridge in 1973, as well as between the Twin Towers of the World Trade Center in New York City in August 7, 1974.

Since then, Petit has lived in New York, where he has been artist-in-residence at the Cathedral of St. John the Divine, another site of his aerial performances. He has done wire walking as part of official celebrations in New York, across the United States, and in France and other countries, as well as teaching workshops on the art. In 2008, *Man on Wire*, a documentary directed by James Marsh about Petit's walk between the towers, won numerous awards including the 2009 Academy Award for Best Documentary Feature. *The Walk*, a film based on Petit's walk, was released in September 2015, starring Joseph Gordon-Levitt as Petit and directed by Robert Zemeckis. Petit was also the subject of a children's book and an animated adaptation of it, released in 2005.

He also became adept at equestrianism, juggling, fencing, carpentry, rock-climbing, and bullfighting. Spurning circuses and their formulaic performances, he created his street persona on the sidewalks of Paris. In the early 1970s, he visited New York City, where he frequently juggled and worked on a slackline in Washington Square Park.

1 World Trade Center (1970–2001)

The original One World Trade Center (also known as the North Tower, Tower 1, Building One, or 1 WTC) was one of the Twin Towers of the original World Trade Center complex in New York City. It was completed in 1972, stood at a height of 1,368 feet (417.0 m), and was the tallest building in the world until 1973, when surpassed by the Sears Tower in Chicago.

It was distinguishable from its twin, the original 2 World Trade Center, also known as the South Tower, by the 360-foot (110 m) telecommunications antenna on its roof. Including the antenna, the building stood at a total height of 1,728 feet (526.7 m). Other things that made the North Tower distinguishable from its twin was a canopy connected to the North Tower's west facade on street level as well as two pedestrian walkways that extended from the west and south promenades of Three and Six World Trade Center to the North Tower's north and south facades on plaza level, all of which the South Tower lacked. The building's address was 1 World Trade Center, and the WTC complex had its own ZIP code (10048) due to its large size.

The original World Trade Center was destroyed in the terrorist attacks of September 11, 2001. Struck by American Airlines Flight 11 at 8:46 a.m., the North Tower was the first of the Twin Towers to be hit by a hijacked aircraft, and the second to collapse, at 10:28 a.m. The North Tower stood for 102 minutes after the aircraft impact. Of the 2,977 victims killed in the attacks, around 1,700 were in the North Tower or on the ground.

The North Tower was succeeded by the present-day One World Trade Center tower, which was opened in November 2014 as the lead building of the redeveloped World Trade Center site. At the National September 11 Memorial & Museum, the northern pool marks the spot where the North Tower once stood.

Flak tower

flak towers were built at outlying German strongpoints, such as at Angers in France, and Heligoland in Germany. The towers were operated by the Luftwaffe - Flak towers (German: Flaktürme) were large, above-ground, anti-aircraft gun blockhouse towers constructed by Nazi Germany. "Flak" is short for anti-aircraft

gun in German: Flugabwehrkanone. There were eight flak tower complexes in the cities of Berlin (three), Hamburg (two), and Vienna (three) from 1940. Other cities that used flak towers included Stuttgart and Frankfurt. Smaller single-purpose flak towers were built at outlying German strongpoints, such as at Angers in France, and Heligoland in Germany.

The towers were operated by the Luftwaffe to defend against Allied strategic air raids against these cities during World War II. They also served as air-raid shelters for tens of thousands of local civilians.
