

Architect

Architect

An architect is a person who plans, designs, and oversees the construction of buildings. To practice architecture means to provide services in connection - An architect is a person who plans, designs, and oversees the construction of buildings. To practice architecture means to provide services in connection with the design of buildings and the space within the site surrounding the buildings that have human occupancy or use as their principal purpose. Etymologically, the term architect derives from the Latin architectus, which derives from the Greek (arkhi-, chief + tekton, builder), i.e., chief builder.

The professional requirements for architects vary from location to location. An architect's decisions affect public safety, and thus the architect must undergo specialised training consisting of advanced education and a practicum (or internship) for practical experience to earn a license to practice architecture. Practical, technical, and academic requirements for becoming an architect vary by jurisdiction though the formal study of architecture in academic institutions has played a pivotal role in the development of the profession.

George Clarke (architect)

George Clarke (born 27 May 1974) is an English architect, television presenter, lecturer and writer, best known for his work on the Channel 4 programmes - George Clarke (born 27 May 1974) is an English architect, television presenter, lecturer and writer, best known for his work on the Channel 4 programmes The Home Show, The Restoration Man, George Clarke's Old House New Home, and George Clarke's Amazing Spaces.

Architect (disambiguation)

Look up architect in Wiktionary, the free dictionary. An architect is a professional trained in the planning, design, and supervision of the construction - An architect is a professional trained in the planning, design, and supervision of the construction of buildings.

Architect may also refer to:

Prison Architect

Prison Architect is a private prison construction and management simulation video game developed and published by Introversion Software. It was made available - Prison Architect is a private prison construction and management simulation video game developed and published by Introversion Software. It was made available as a crowdfunded paid alpha pre-order on September 25, 2012 with updates that were scheduled every three to four weeks until 2023. Data architect

A data architect is a practitioner of data architecture, a data management discipline concerned with designing, creating, deploying and managing an organization's - A data architect is a practitioner of data architecture, a data management discipline concerned with designing, creating, deploying and managing an organization's data architecture. Data architects define how the data will be stored, consumed, integrated and managed by different data entities and IT systems, as well as any applications using or processing that data in some way. It is closely allied with business architecture and is considered to be one of the four domains of enterprise architecture.

Neoclassical architecture

neoclassical elements were introduced to Tuscany by architect Jean Nicolas Jadot de Ville-Issey, the court architect of Francis Stephen of Lorraine. On Jadot's - Neoclassical architecture, sometimes referred to as Classical Revival architecture, is an architectural style produced by the Neoclassical movement that began in the mid-18th century in Italy, France and Germany. It became one of the most prominent architectural styles in the Western world. The prevailing styles of architecture in most of Europe for the previous two centuries, Renaissance architecture and Baroque architecture, already represented partial revivals of the Classical architecture of ancient Rome and ancient Greek architecture, but the Neoclassical movement aimed to strip away the excesses of Late Baroque and return to a purer, more complete, and more authentic classical style, adapted to modern purposes.

The development of archaeology and published accurate records of surviving classical buildings was crucial in the emergence of Neoclassical architecture. In many countries, there was an initial wave essentially drawing on Roman architecture, followed, from about the start of the 19th century, by a second wave of Greek Revival architecture. This followed increased understanding of Greek survivals. As the 19th century continued, the style tended to lose its original rather austere purity in variants like the French Empire style. The term "neoclassical" is often used very loosely for any building using some of the classical architectural vocabulary.

In form, Neoclassical architecture emphasizes the wall rather than chiaroscuro and maintains separate identities to each of its parts. The style is manifested both in its details as a reaction against the Rococo style of naturalistic ornament, and in its architectural formulae as an outgrowth of some classicizing features of the Late Baroque architectural tradition. Therefore, the style is defined by symmetry, simple geometry, and social demands instead of ornament. In the 21st century, a version of the style continues, sometimes called New Classical architecture or New Classicism.

Solution architecture

recognize the role "solution architect" in its TOGAF skills framework; on the other hand, Glassdoor advertised 55,000 Solution Architect roles in August 2020 - Solution architecture is a term used in information technology with various definitions, such as "a description of a discrete and focused business operation or activity and how IS/IT supports that operation".

Landscape architect

A landscape architect is a person who is educated in the field of landscape architecture. The practice of landscape architecture includes: site analysis - A landscape architect is a person who is educated in the field of landscape architecture. The practice of landscape architecture includes: site analysis, site inventory, site planning, land planning, planting design, grading, storm water management, sustainable design, construction specification, and ensuring that all plans meet the current building codes and local and federal ordinances.

The practice of landscape architecture dates to some of the earliest of human cultures and just as much as the practice of medicine has been inimical to the species and ubiquitous worldwide for several millennia. However, this article examines the modern profession and educational discipline of those practicing the design of landscape architecture.

In the 1700s, Humphry Repton described his occupation as "landscape gardener" on business cards he had prepared to represent him in work that now would be described as that of a landscape architect.

The title, "landscape architect", was first used by Frederick Law Olmsted, the designer of New York City's Central Park in Manhattan and numerous projects of large scale both public and private. He was the founder of a firm of landscape architects who employed highly skilled professionals to design and execute aspects of projects designed under his auspices.

Depending on the jurisdiction, landscape architects who pass state requirements to become registered, licensed, or certified may be entitled to use the postnominal letters corresponding to their seal, typically RLA (Registered Landscape Architect) or more recently, PLA (Professional Landscape Architect) n. In the US, all 50 states have adopted licensure. The American Society of Landscape Architects endorses the postnominal letters PLA, for Professional Landscape Architect, even though there is no legal or professional distinction between the use of RLA or PLA.

Architect of the Capitol

The Architect of the Capitol is the federal agency responsible for the maintenance, operation, development, and preservation of the United States Capitol - The Architect of the Capitol is the federal agency responsible for the maintenance, operation, development, and preservation of the United States Capitol Complex. It is an agency of the legislative branch of the federal government and is accountable to the United States Congress and the Supreme Court. Both the agency and the head of the agency are called "Architect of the Capitol". The head of the agency is appointed by a vote of a congressional commission for a ten-year term. Prior to 2024, the president of the United States appointed the architect upon confirmation vote by the United States Senate, and was accountable to the president.
