

Md Program Discontinued

Hi-MD

high-capacity 1 gigabyte Hi-MD discs, in the same dimensions as MiniDisc. The last recorder and player was discontinued in 2011. Blank discs stopped - Hi-MD is a magneto-optical disc-based data storage format. It was a further development of the MiniDisc. With its release in late 2004, came the ability to use newly developed, high-capacity 1 gigabyte Hi-MD discs, in the same dimensions as MiniDisc. The last recorder and player was discontinued in 2011. Blank discs stopped production in September 2012.

Doctor of Medicine

A Doctor of Medicine (abbreviated M.D., from the Latin *Medicinae Doctor* or *Dr. med.*, from the inverse construction) is a medical degree, the meaning of - A Doctor of Medicine (abbreviated M.D., from the Latin *Medicinae Doctor* or *Dr. med.*, from the inverse construction) is a medical degree, the meaning of which varies between different jurisdictions. In the United States, and some other countries, the MD denotes a professional degree of physician. This generally arose because many in 18th-century medical professions trained in Scotland, which used the MD degree nomenclature. In England, however, Bachelor of Medicine, Bachelor of Surgery (MBBS) was used: in the 19th century, it became the standard in Scotland too. Thus, in the United Kingdom, Ireland and other countries, the MD is a research doctorate, honorary doctorate or applied clinical degree restricted to those who already hold a professional degree (Bachelor's/Master's/Doctoral) in medicine. In those countries, the equivalent professional degree to the North American, and some others' usage of MD is still typically titled Bachelor of Medicine, Bachelor of Surgery.

List of House episodes

House, also known as House, M.D., is an American medical drama series which ran for eight seasons on Fox. on November 16, 2004. House was created by David - House, also known as House, M.D., is an American medical drama series which ran for eight seasons on Fox. on November 16, 2004. House was created by David Shore. The show follows Gregory House (Hugh Laurie), a maverick medical genius who heads a team of diagnosticians at the fictional Princeton-Plainsboro Teaching Hospital (PPTH) in New Jersey. In a typical episode, the team is presented with an unusual case; the storyline follows the diagnosis of the patient's illness, a process often complicated by the internal competition and personal foibles of the diagnostic team. The team leader, House, frequently clashes with his boss Dr. Lisa Cuddy (Lisa Edelstein) in seasons 1 to 7, and Dr. Eric Foreman in season 8, and his only friend, Dr. James Wilson (Robert Sean Leonard).

In seasons 1 to 3, House's diagnostic team includes Dr. Allison Cameron (Jennifer Morrison), Dr. Robert Chase (Jesse Spencer) and Dr. Eric Foreman (Omar Epps). This team leaves the show in the third season finale "Human Error". The show achieved its highest ranking with the episode "Human Error"; this episode placed the series in first position for the week it aired. Each season introduces a recurring guest star, who appears in a multi-episode story arc. The fourth season was the only exception to this pattern. It introduced seven new characters who compete for the coveted positions on House's team, replacing Cameron, Chase and Foreman. House eventually selects Dr. Chris Taub (Peter Jacobson), Dr. Lawrence Kutner (Kal Penn) and Dr. Remy "Thirteen" Hadley (Olivia Wilde) as his new team; Foreman rejoins soon after. Following Kutner's death in season five, through a series of plot twists, House reacquires Chase, one of the original team members.

When House resigns early in season six, Foreman takes his place, but he soon fires Thirteen, and Taub quits because he was there only to work with House. After this, Foreman hires both Cameron and Chase, but, soon,

House comes back, spurring the return of Thirteen and Taub, too. When the dictator ("The Tyrant") dies because of Chase's intentional misunderstanding, Cameron and even Chase decide to leave the PPTH. But, Chase's desire to be part of House's team makes Cameron quit (though she later returns for the episode "Lockdown"). At the beginning of season seven, Thirteen ostensibly goes away to Rome (it's later revealed that this was actually a lie), leaving a vacancy on House's team. House proposes then, giving a chance to the rest of his team, to hire a new member. After some unsuccessful tries, Cuddy hires Martha M. Masters (Amber Tamblyn), a medical student in the episode "Office Politics". In the episode "Last Temptation", Masters takes the final choice to leave House's team. After being incarcerated following the events of "Moving On", House is released on probation thanks to Foreman, who has taken Cuddy's place as the Dean of Medicine. House is initially assigned a single team member, Dr. Chi Park (Charlyne Yi). After securing funding for his department in the season eight episode "Risky Business", House brings on former prison doctor Jessica Adams (Odette Annable) and rehires Chase and Taub.

Since its premiere, the show has constantly received both high ratings and critical acclaim. Eight seasons were aired in the United States, the fourth of which was interrupted by the 2007–2008 Writers Guild of America strike and included only 16 episodes instead of the regular 22–24. Despite this interruption, House achieved its highest number of viewers for the episode "Frozen", for which there were over 29 million viewers on the night it aired due to its position as the lead-out program for Super Bowl XLII. In January 2009, House moved from its Tuesday, 8:00 pm ET slot to a new time slot of Monday nights at 8:00 pm ET, immediately before the Fox hit 24. Fox renewed the show for a seventh season, which premiered on September 20, 2010. An eighth season was announced on May 10, 2011 and premiered on October 3, 2011. On February 8, 2012, Fox announced that the season would be House's last.

All eight seasons were released on DVD and Blu-ray by Universal in North America, Europe and Australia. As of June 16, 2009, the show has been aired in more than 60 countries, with 86 million viewers worldwide. In the following list, the number in the first column refers to the episode's number within the entire series. The second column indicates the episode's number within that season. "US viewers in millions" refers to the number of Americans in millions who watched the episode live while it was broadcast or by a few hours later with a digital video recorder.

A total of 177 episodes of House were broadcast over eight seasons, with the series finale airing on May 21, 2012.

The show started on November 16, 2004, and received a high viewing rating throughout its run. It achieved a maximum 29.04 million viewers and its highest overall rank is seventh during its third and fourth seasons. It also ranked sixth in the 18–49 age range during its second season.

United States Medical Licensing Examination

pandemic, USMLE Step 2CS was initially suspended and later discontinued. A review of the program was enacted in 2009. USMLE claimed it was done with the - The United States Medical Licensing Examination (USMLE) is a three-step examination program for medical licensure in the United States sponsored by the Federation of State Medical Boards (FSMB) and the National Board of Medical Examiners (NBME). Physicians with a Doctor of Medicine (MD) degree are required to pass the USMLE for medical licensure. However, those with a Doctor of Osteopathic Medicine degree (DO) are required to take the COMLEX-USA (COMLEX) exams but may also sit for the USMLE as well.

States may enact additional testing and/or licensing requirements.

It is owned by R3 Education, Inc., which is part of Global University Systems, which also owns Saba University School of Medicine and St. Matthew's University. MUA offers an internationally accredited MD program that confers upon its graduates the Doctor of Medicine (MD) degree, as well as multiple pre-medical programs.

Amiga E

Amiga E is a programming language created by Wouter van Oortmerssen on the Amiga computer. The work on the language started in 1991 and was first released - Amiga E is a programming language created by Wouter van Oortmerssen on the Amiga computer. The work on the language started in 1991 and was first released in 1993. The original incarnation of Amiga E was being developed until 1997, when the popularity of the Amiga platform dropped significantly after the bankruptcy of Amiga intellectual property owner Escom AG.

According to Wouter van Oortmerssen:"It is a general-purpose programming language, and the Amiga implementation is specifically targeted at programming system applications. [...]"In his own words:"Amiga E was a tremendous success, it became one of the most popular programming languages on the Amiga."

Doctor of Osteopathic Medicine

are equivalent to those at schools granting the MD degree. Both US-granted MD and US-granted DO programs are listed in the World Directory of Medical Schools - Doctor of Osteopathic Medicine (DO or D.O., or in Australia DO USA) is a medical degree conferred by the 42 osteopathic medical schools in the United States. DO and Doctor of Medicine (MD) degrees are equivalent: a DO graduate may become licensed as a physician or surgeon and thus have full medical and surgical practicing rights in all 50 US states. As of 2023, there were 186,871 osteopathic physicians and medical students in DO programs across the United States. Osteopathic medicine (as defined and regulated in the United States) emerged historically from the quasi-medical practice of osteopathy, but has become a distinct and proper medical profession.

As of 2024, 28% of all U.S. medical students were DO students, while 11% of all U.S. physicians were osteopathic physicians. The curricula at DO-granting medical schools are equivalent to those at MD-granting medical schools, which focus the first two years on the biomedical and clinical sciences, then two years on core clinical training in the clinical specialties.

One notable difference between DO and MD training is that DOs spend an additional 300–500 hours to study pseudoscientific hands-on manipulation of the human musculoskeletal system (osteopathic manipulative technique) alongside conventional evidence-based medicine and surgery like their MD peers.

Upon completing medical school, a DO graduate can enter an internship or residency training program, which may be followed by fellowship training. DO graduates attend the same graduate medical education

programs as their MD counterparts.

List of NCAA Division I FBS football programs

Beach State rebranded its athletic program as "The Beach" effective in 2020–21, long after football was discontinued. McNeese dropped the word "State" - This is a list of the 136 schools in the Division I Football Bowl Subdivision (FBS) of the National Collegiate Athletic Association (NCAA) in the United States. By definition, all schools in this grouping have varsity football teams.

Schools in Division I FBS are distinguished from those in the Division I Football Championship Subdivision (FCS) by being allowed to provide scholarship aid to a total of 85 players, and may grant a full scholarship to all 85. FCS schools are limited to financial assistance amounting to a maximum of 63 full scholarships, although some conferences voluntarily place further restrictions on athletic aid. The NCAA classifies FBS football as a "head-count" sport, meaning that each player receiving any athletically-related aid from the school counts fully against the 85-player limit. By contrast, FCS football is classified as an "equivalency" sport, which means that scholarship aid is limited to the equivalent of a specified number of full scholarships. In turn, this means that FCS schools can freely grant partial scholarships, but are also limited to a total of 85 players receiving assistance. Another NCAA rule mandates that any multi-sport athlete who plays football and receives any athletic aid is counted against the football limit, with an exception for players in non-scholarship FCS programs who receive aid in another sport. The three service academies that play in Division I FBS, Air Force, Army, and Navy, are theoretically subject to this rule, but are exempt in practice because all students at these schools receive full scholarships from the federal government.

Starting in 2014, the FBS began playing a tournament known as the College Football Playoff (CFP) culminating in a National Championship Game to determine its national champion, a system that has been in place from the 2014–2025 seasons by contract with ESPN, broadcaster of the games. The CFP featured four teams from its first season in 2014 through the 2023 season, and is expanding to 12 teams in 2024. But since the CFP is not sanctioned by the NCAA, this makes FBS football the only sport without an NCAA-sanctioned champion. The FCS is the highest division in college football to hold a playoff tournament sanctioned by the NCAA to determine its champion.

Conference affiliations are current for the 2025 season.

The list includes all current and former FBS, Division I-A, Division I, University Division, and Major-College football teams since 1946 when the NCAA started having continuous records of major football teams. In the 1940s, 50s, and 60s major-status was only based on whether the team had a majority of their schedule filled with major opponents which caused schools like Arizona State to lose "major" status in certain years and schools that were on the borderline like Idaho and Pacific who scheduled each other in certain seasons to change status almost every other year.

Mount St. Mary's Mountaineers men's soccer

participating in the Metro Atlantic Athletic Conference. The sport was discontinued following the 2012 season for financial reasons but resumed in 2018. - The Mount St. Mary's Mountaineers men's soccer team represents Mount St. Mary's University participating in the Metro Atlantic Athletic Conference. The sport was discontinued following the 2012 season for financial reasons but resumed in 2018.
