it is when we combine Psychology and Linguistics in order to understand the relationship between the human brain and language in general. It deals with whatever happens in one's brain whenever they produce or receive language both written and

he said that every human being is born predisposed with basic rules of grammar this is why it is easy for them to learn a language although some languages are complicated to learn

Sensation and perception Sensations are brought by different stimuli in our environment. The stimuli first reach our senses and Once we receive this information, perception takes over and we start interpreting these stimuli. (Perception is the ability to capture, process, and make sense of the information that our senses receive.)

Attention Life has many stimuli happening at the same time, however, we are capable of centering our attention on the stimuli that interest us. Some actions such as walking and chewing require little attention, but other activities such as speaking requires focus, especially when we are giving a lecture.

humans are capable of producing and comprehending different Sounds and words, combine different letters and phrases and expressing with precision what we want to communicate, even in different languages. We even use our body language to communicate

10 Incredible Facts About Psycholinguistics | KNOW iT - 10 Incredible Facts About Psycholinguistics | KNOW iT 1 minute - Ever wondered how your brain turns thoughts into words? Or how children learn to speak so effortlessly? In this video, we dive ...
