Death of John O'Keefe

Brian Albert's home in Canton, Massachusetts. O'Keefe's girlfriend, Karen Read, had dropped him off at the party shortly after midnight and returned early - On January 29, 2022, at 6:03 am, Boston police officer John O'Keefe was found unconscious on the front lawn at fellow Boston police officer Brian Albert's home in Canton, Massachusetts. O'Keefe's girlfriend, Karen Read, had dropped him off at the party shortly after midnight and returned early that morning to find his body. He was declared dead at 7:59 am at a local hospital. An autopsy performed two days later found that O'Keefe died of impact injuries to the head, although his manner of death was undetermined.

Read was subsequently arrested and charged with manslaughter, motor vehicle homicide, and leaving the scene of a motor vehicle collision causing death. Prosecutors alleged that she had killed O'Keefe by backing into him with her car after dropping him off. Read's defense team alleged that O'Keefe was murdered in the house, and that the police officers involved in the case used their resources to taint the investigation and frame Read. Following a grand jury indictment, Read's charges were upgraded to second-degree murder, manslaughter while operating under the influence of alcohol, and leaving the scene of personal injury and death.

Read's first criminal trial resulted in a mistrial on July 1, 2024, due to a hung jury. She was tried for a second time beginning on April 1, 2025, and ultimately found not guilty on all three major charges. She was found guilty of operating a vehicle under the influence, receiving the standard sentence of one year of probation.

The case has drawn national attention due to local journalist Aidan Kearney's investigation of evidence of foul play in the murder of O'Keefe. His multi-part series, "Canton Cover-Up", exposes the close relationships between law enforcement and those who were present at the Canton home on the night of O'Keefe's death.

a sequel to the Read or Die OVA. Its official title of R.O.D the TV is a catch-all acronym referring to the inclusion of characters from both Read or Die (the light novels, manga and OVA) and the Read or Dream manga, the latter of which revolves solely around the Paper Sisters (except, Yomiko Readman does make a cameo appearance in the last chapter; the manga is not considered canon to the TV storyline). Promotional material for R.O.D the TV implies that the show centers around the three sisters of Read or Dream; however, Nenene Sumiregawa of Read or Die is also considered a protagonist.

R.O.D the TV was broadcast for 26 episodes from October 1, 2003, to March 16, 2004, on pay-per-view satellite television platform SKY PerfecTV!. It also aired across the terrestrial Fuji Television station from October 15, 2003, to March 18, 2004. It was also broadcast worldwide by the anime satellite television network, Animax.

The series was first distributed on DVD in North America by Geneon, in seven discs; the company finished releasing the series in summer 2005. Aniplex of America re-released the original Read or Die episodes and the TV series on Blu-ray in Winter 2010/2011.

Data stored in ROM cannot be electronically modified after the manufacture of the memory device. Read-only memory is useful for storing software that is rarely changed during the life of the system, also known as firmware. Software applications, such as video games, for programmable devices can be distributed as plug-in cartridges containing ROM.

Strictly speaking, read-only memory refers to hard-wired memory, such as diode matrix or a mask ROM integrated circuit (IC), that cannot be electronically changed after manufacture. Although discrete circuits can be altered in principle, through the addition of bodge wires and the removal or replacement of components, ICs cannot. Correction of errors, or updates to the software, require new devices to be manufactured and to replace the installed device.

Floating-gate ROM semiconductor memory in the form of erasable programmable read-only memory (EPROM), electrically erasable programmable read-only memory (EEPROM) and flash memory can be erased and re-programmed. But usually, this can only be done at relatively slow speeds, may require special equipment to achieve, and is typically only possible a certain number of times.

The term "ROM" is sometimes used to refer to a ROM device containing specific software or a file with software to be stored in a writable ROM device. For example, users modifying or replacing the Android operating system describe files containing a modified or replacement operating system as "custom ROMs" after the type of storage the file used to be written to, and they may distinguish between ROM (where software and data is stored, usually Flash memory) and RAM.

ROM and RAM are essential components of a computer, each serving distinct roles. RAM, or Random Access Memory, is a temporary, volatile storage medium that loses data when the system powers down. In contrast, ROM, being non-volatile, preserves its data even after the computer is switched off.

She and Anne Bonny were among the few female pirates during the "Golden Age of Piracy".

Much of Read's background is unknown. The first biography of Read comes from Captain Charles Johnson's 1724 book, A General History of the Pyrates. According to Johnson, Read was born in England, dressed as a boy much of her childhood, eventually joined the military and later moved to the West Indies. Though Johnson's version of events has become generally accepted, there is little evidence to support it.

At an unknown date, Read traveled to the Bahamas where she became acquainted with the pirate John Rackham. In August 1720, Read joined Rackham's crew, alongside another female pirate, Anne Bonny. Together they stole the sloop William owned by John Ham from Nassau on 22 August 1720. Rackham and his crew carried out a number of attacks on merchant ships in the West Indies until they were captured by former privateer Jonathan Barnet following a brief naval engagement in October 1720 near Jamaica. Rackham was executed in November, but Read and Bonny both claimed to be pregnant during their trials and received a stay of execution.

While Anne Bonnys fate is unknown, Mary Read died while imprisoned in Spanish Town around April 1721 of an unknown cause.
