

Have You Seen My Dinosaur

Barney & Friends

with the song "I Love You", sung to the tune of "This Old Man". Despite being a carnivorous type dinosaur, Barney does not have a carnivore's fearsome - Barney & Friends is an American children's television series created by Sheryl Leach targeted at children ages two to five. The flagship production of the Barney franchise, it originally aired on PBS under the PBS Kids brand from April 6, 1992 to November 2, 2010, although new videos were still released on various dates after the last episode aired. It features and stars Barney, an anthropomorphic purple Tyrannosaurus rex who conveys educational messages through songs and small dance routines with a friendly, huggable and optimistic attitude. Reruns aired on Sprout from 2005 to 2015, and from December 17, 2018 to January 25, 2020 on Sprout's successor network, Universal Kids, until the latter's closure on March 6, 2025. On October 6, 2015, the series was initially renewed for revival with a new season to premiere in 2017, but that never came to fruition. A CGI-animated series aired on Cartoon Network's Cartoonito on October 18, 2024, and streamed on Max on October 14, 2024.

While popular with its intended audience, Barney & Friends drew severe negative reaction from adults, who mocked the title character in popular culture through song parodies and comedy routines such as being beaten up by NBA star Charles Barkley on a Saturday Night Live episode.

Dinosaurs in Jurassic Park

of prehistoric animals (mainly non-avian dinosaurs) through ancient DNA extracted from mosquitoes that have been fossilized in amber. The franchise explores - Jurassic Park, later also referred to as Jurassic World, is an American science fiction media franchise. It focuses on the cloning of prehistoric animals (mainly non-avian dinosaurs) through ancient DNA extracted from mosquitoes that have been fossilized in amber. The franchise explores the ethics of cloning and genetic engineering and the morals behind de-extinction, commercialization of science, and animal cruelty.

The franchise began in 1990 with the release of Michael Crichton's novel Jurassic Park. A 1993 film adaptation, also titled Jurassic Park, was directed by Steven Spielberg. Crichton then wrote a sequel novel, The Lost World (1995), and Spielberg directed its film adaptation, The Lost World: Jurassic Park (1997). Additional films have been released since then, including Jurassic Park III in 2001, completing the original trilogy of films.

The fourth installment, Jurassic World, was released in 2015, marking the start of a new trilogy. Its sequel, Jurassic World: Fallen Kingdom, was released in 2018. Jurassic World Dominion, released in 2022, marks the conclusion of the second trilogy. A standalone sequel, Jurassic World Rebirth, was released in 2025. Two Jurassic World short films have also been released: Battle at Big Rock (2019) and a Jurassic World Dominion prologue (2021).

Theropod dinosaurs like Tyrannosaurus and Velociraptor have had major roles throughout the film series. Other species, including Brachiosaurus and Spinosaurus, have also played significant roles. The series has also featured other creatures, such as Mosasaurus and members of the pterosaur group, both commonly misidentified by the public as dinosaurs. The various creatures in the films were created through a combination of animatronics and computer-generated imagery (CGI). For the first three films, the animatronics were created by special-effects artist Stan Winston and his team, while Industrial Light &

Magic (ILM) handled the CGI for the entire series. The first film garnered critical acclaim for its innovations in CGI technology and animatronics. Since Winston's death in 2008, the practical dinosaurs have been created by other artists, including Legacy Effects (Jurassic World), Neal Scanlan (Jurassic World: Fallen Kingdom), and John Nolan (Jurassic World Dominion and Jurassic World Rebirth).

Paleontologist Jack Horner has served as the longtime scientific advisor on the films, and paleontologist Stephen L. Brusatte was also consulted for Jurassic World Dominion and Jurassic World Rebirth. The original film was praised for its modern portrayal of dinosaurs. Horner said that it still contained many inaccuracies, such as not portraying dinosaurs as having colorful feathers, but noted that it was not meant as a documentary. Later films in the series contain inaccuracies as well, for entertainment purposes. This includes the films' velociraptors, which are depicted as being larger than their real-life counterparts. In addition, the franchise's method for cloning dinosaurs has been deemed scientifically implausible for a number of reasons.

Dinosaur Train

are all Pteranodons, takes the Dinosaur Train to explore the Mesozoic, and have adventures with a variety of dinosaurs. It is produced by The Jim Henson Company - Dinosaur Train is an animated television series aimed at children ages 3 to 6 and created by Craig Bartlett, who also created Nickelodeon's Hey Arnold!. The series features a Tyrannosaurus rex named Buddy who, together with the rest of his family, who are all Pteranodons, takes the Dinosaur Train to explore the Mesozoic, and have adventures with a variety of dinosaurs. It is produced by The Jim Henson Company in association with the Infocomm Media Development Authority (formerly the Media Development Authority), Sparky Animation, FableVision, Snee-Oosh, Inc., Reel FX, and Sea to Sky Entertainment. As of September 2018, PBS Kids had ordered 11 more episodes, taking the total number of episodes to 100. A film based on the series from Universal Pictures and Universal 1440 Entertainment titled, Dinosaur Train: Adventure Island premiered on April 12, 2021.

A revival is currently in the works at the Jim Henson Company.

Sue (dinosaur)

October 1997 for US\$8.3 million, one of the highest amounts ever paid for a dinosaur fossil. Sue is now a permanent feature at the Field Museum of Natural History - Sue (stylized: SUE), officially designated FMNH PR 2081, is one of the largest, most extensive, and best preserved Tyrannosaurus rex fossils ever found, at over 90 percent recovered by bulk.

FMNH PR 2081 was discovered on August 12, 1990, by American explorer and fossil collector Sue Hendrickson, after whom it is named. After ownership disputes were settled, Sue was auctioned in October 1997 for US\$8.3 million, one of the highest amounts ever paid for a dinosaur fossil. Sue is now a permanent feature at the Field Museum of Natural History in Chicago, Illinois.

Dinosaurs (TV series)

Dinosaurs is an American family sitcom television series that aired on ABC from April 26, 1991 to July 20, 1994. The show, about a family of anthropomorphic - Dinosaurs is an American family sitcom television series that aired on ABC from April 26, 1991 to July 20, 1994. The show, about a family of anthropomorphic dinosaurs, was produced by Michael Jacobs Productions and Jim Henson Television in association with Walt Disney Television and distributed by Buena Vista International, Inc. The characters were designed by Henson team member Kirk Thatcher.

Moon Girl and Devil Dinosaur

Marvel's Moon Girl and Devil Dinosaur (or simply Moon Girl and Devil Dinosaur) is an American animated superhero comedy television series developed by - Marvel's Moon Girl and Devil Dinosaur (or simply Moon Girl and Devil Dinosaur) is an American animated superhero comedy television series developed by Steve Loter, Jeffrey M. Howard, and Kate Kondell for Disney Channel. Based on Moon Girl And Devil Dinosaur by Marvel Comics, the series follows Lunella Lafayette and her dinosaur companion Devil Dinosaur.

The series features the voices of Diamond White, Fred Tatasciore, Alfre Woodard, Sasheer Zamata, Jermaine Fowler, Gary Anthony Williams, Libe Barer, and Laurence Fishburne. Development began after Marvel Studios president Louis D'Esposito showed Fishburne the comic book series Moon Girl And Devil Dinosaur. His interest piqued, having been a fan of the original Moon-Boy and Devil Dinosaur, Fishburne sought to make an animated series based on the duo. Production proceeded for two years before Steve Loter was hired as an executive producer. After a successful pitch to Disney Television Animation executives, the series was greenlit and publicly announced in February 2018. It is produced by Cinema Gypsy Productions, Disney Television Animation, and Marvel Animation, with animation by Flying Bark Productions.

In October 2022, ahead of the series premiere, the series was renewed for a second season. Marvel's Moon Girl and Devil Dinosaur premiered on Disney Channel on February 10, 2023, and was released on Disney+ five days later. The series received highly positive reviews for its writing, animation, soundtrack, representation, and characters. The series won five Children's and Family Emmy Awards. The second season premiered on February 2, 2024, with the remaining episodes of the second season premiering on February 6, 2025. A crossover with Spidey and His Amazing Friends, "Moon Girl and the Dino Dilemma", aired on November 15, 2024, with White and Tatasciore reprising their roles.

Dinosaur (2000 film)

Dinosaur is a 2000 American live-action/animated adventure film produced by Walt Disney Feature Animation in association with The Secret Lab, and released - Dinosaur is a 2000 American live-action/animated adventure film produced by Walt Disney Feature Animation in association with The Secret Lab, and released by Walt Disney Pictures. The film was directed by Ralph Zondag and Eric Leighton and produced by Pam Marsden, from a screenplay written by John Harrison, Robert Nelson Jacobs, and Walon Green, and a story by the trio alongside Zondag and Thom Enriquez. It features the voices of D. B. Sweeney, Alfre Woodard, Ossie Davis, Max Casella, Hayden Panettiere, Samuel E. Wright, Julianna Margulies, Peter Siragusa, Joan Plowright, and Della Reese. The story follows a young Iguanodon who was adopted and raised by a family of lemurs on a tropical island. They are forced to the mainland by a catastrophic meteorite impact; setting out to find a new home, they join a herd of dinosaurs heading for the "Nesting Grounds", but must contend with the group's harsh leader, as well as external dangers such as predatory Carnotaurus.

The initial idea was conceived in 1986 by Phil Tippett and Paul Verhoeven, which they conceived as a darker, naturalistic film about dinosaurs. The project underwent numerous iterations with multiple directors attached. In 1994, Walt Disney Feature Animation began development on the project and spent several years developing the software to create the dinosaurs. While the characters in Dinosaur are computer-generated, most of the backgrounds are live-action and were filmed on location. A number of backgrounds were found in various continents such as the Americas and Asia; various tepuis and Angel Falls also appear in the film. With a budget of \$127.5 million, Dinosaur was reportedly the most expensive computer-animated film at the time. Dinosaur is also the first film from Walt Disney Feature Animation to be 3D animated.

Dinosaur was released on May 19, 2000, to mixed-to-positive reviews from critics, who praised the film's opening sequence, soundtrack and animation, but criticized the story and screenplay for its lack of originality. The film grossed \$349.8 million worldwide, becoming the fifth highest-grossing film of 2000. It became the fourth best-selling home video release of 2001, selling 10.6 million copies and garnering \$198 million in

sales.

Jurassic World Rebirth

saying, "Once that happened, you can go anywhere in the world and you can have as many crazy dinosaur situations as you want. I was more limited. I find - Jurassic World Rebirth is a 2025 American science fiction action film directed by Gareth Edwards and written by David Koepp. It takes place three years after Jurassic World Dominion (2022), and is the fourth Jurassic World film as well as the seventh installment overall in the Jurassic Park franchise. The film stars Scarlett Johansson, Mahershala Ali, Jonathan Bailey, Rupert Friend, Manuel Garcia-Rulfo, and Ed Skrein. In Jurassic World Rebirth, the world's dinosaurs live around the equator, which provides the last viable climate for them to survive. A team travels to a former island research facility where the three largest prehistoric animals reside, with the goal of extracting samples that are vital for a heart disease treatment. The team also rescues a shipwrecked family, and both groups struggle to survive after becoming stranded on the island.

Work on the film began shortly after the release of Jurassic World Dominion, when executive producer Steven Spielberg recruited Koepp to help him develop a new installment in the series. Koepp previously co-wrote the original Jurassic Park film (1993) and wrote its sequel, The Lost World: Jurassic Park (1997). Development of Rebirth was first reported in January 2024. Edwards was hired as director a month later, and casting commenced shortly thereafter. Principal photography took place in Thailand, Malta, and the United Kingdom from June to September 2024.

Jurassic World Rebirth premiered on June 17, 2025, at Odeon Luxe Leicester Square in London, and was released in the United States and Canada by Universal Pictures on July 2. The film received mixed reviews from critics, though some deemed it an improvement over previous entries. It has grossed \$845 million worldwide against a budget of \$180–\$225 million, making it the fourth-highest-grossing film of 2025.

Beginner Books

I'll Teach My Dog a Lot of Words written by Michael Frith, illustrated by P. D. Eastman Big Dog...Little Dog by P. D. Eastman Are You My Mother? by P - Beginner Books is the Random House imprint for young children ages 3–9, co-founded by Phyllis Cerf with Ted Geisel, more often known as Dr. Seuss, and his wife Helen Palmer Geisel. Their first book was Dr. Seuss's The Cat in the Hat (1957), whose title character appears in the brand's logo. Cerf compiled a list of 379 words as the basic vocabulary for young readers, along with another 20 slightly harder "emergency" words. No more than 200 words were taken from that list to write The Cat in the Hat. Subsequent books in the series were modeled on the same requirement.

Beginner Books had only four titles in their catalog in 1958. Two years later, they were earning 1 million dollars a year. Random House acquired Beginner Books in 1960 and was the largest publisher of children's books in the United States.

YouTube

did my YouTube account get closed down?". The Independent. London. Archived from the original on May 7, 2022. Retrieved August 12, 2009. Why do I have a - YouTube is an American social media and online video sharing platform owned by Google. YouTube was founded on February 14, 2005, by Chad Hurley, Jawed Karim, and Steve Chen, who were former employees of PayPal. Headquartered in San Bruno, California, it is the second-most-visited website in the world, after Google Search. In January 2024, YouTube had more than 2.7 billion monthly active users, who collectively watched more than one billion hours of

videos every day. As of May 2019, videos were being uploaded to the platform at a rate of more than 500 hours of content per minute, and as of mid-2024, there were approximately 14.8 billion videos in total.

On November 13, 2006, YouTube was purchased by Google for US\$1.65 billion (equivalent to \$2.39 billion in 2024). Google expanded YouTube's business model of generating revenue from advertisements alone, to offering paid content such as movies and exclusive content explicitly produced for YouTube. It also offers YouTube Premium, a paid subscription option for watching content without ads. YouTube incorporated the Google AdSense program, generating more revenue for both YouTube and approved content creators. In 2023, YouTube's advertising revenue totaled \$31.7 billion, a 2% increase from the \$31.1 billion reported in 2022. From Q4 2023 to Q3 2024, YouTube's combined revenue from advertising and subscriptions exceeded \$50 billion.

Since its purchase by Google, YouTube has expanded beyond the core website into mobile apps, network television, and the ability to link with other platforms. Video categories on YouTube include music videos, video clips, news, short and feature films, songs, documentaries, movie trailers, teasers, TV spots, live streams, vlogs, and more. Most content is generated by individuals, including collaborations between "YouTubers" and corporate sponsors. Established media, news, and entertainment corporations have also created and expanded their visibility to YouTube channels to reach bigger audiences.

YouTube has had unprecedented social impact, influencing popular culture, internet trends, and creating multimillionaire celebrities. Despite its growth and success, the platform has been criticized for its facilitation of the spread of misinformation and copyrighted content, routinely violating its users' privacy, excessive censorship, endangering the safety of children and their well-being, and for its inconsistent implementation of platform guidelines.
