In use, the fuse attached to the container is lit and the weapon is thrown, shattering on impact. This ignites the flammable substances contained in the bottle and spreads flames as the fuel burns.

Due to their relative ease of production, Molotov cocktails are typically improvised weapons. Their improvised usage spans criminals, gangsters, rioters, football hooligans, urban guerrillas, terrorists, irregular soldiers, freedom fighters, and even regular soldiers; usage in the latter case is often due to a shortage of equivalent military-issued munitions. Despite the weapon's improvised nature and uncertain quality, many modern militaries exercise the use of Molotov cocktails.

However, Molotov cocktails are not always improvised in the field. It is not uncommon for them to be mass-produced to a certain standard as part of preparation for combat. Some examples of this being done are the anti-invasion preparations of the British Home Guard during World War II and the Ukrainian volunteer units during the 2022 Russian invasion of Ukraine. During World War II, Molotov cocktails were even factory produced in several countries, such as Finland, Nazi Germany, the Soviet Union, Sweden, and the United States; some featuring specially designed frangible containers and fuses (such as the US Frangible Grenade M1 for example).

Sweetened liqueurs, wine, or beer may also serve as the base or be added. If beer is one of the ingredients, the drink is called a beer cocktail.

Cocktails often also contain various types of juice, fruit, honey, milk or cream, spices, or other flavorings. Cocktails may vary in their ingredients from bartender to bartender, and from region to region. Two creations may have the same name but taste very different because of differences in how the drinks are prepared.

This article is organized by the primary type of alcohol (by volume) contained in the beverage. Cocktails marked with "IBA" are designated as IBA official cocktails by the International Bartenders Association, and are some of the most popular cocktails worldwide.

The GI cocktail generally - A gastrointestinal cocktail, (also known as a GI cocktail or gastric cocktail), is a mixture of medications used to treat symptoms of dyspepsia. The GI cocktail generally contains a mixture of viscous lidocaine, an antacid, and an anticholinergic. The GI cocktail is commonly prescribed in the hospital or emergency department, and has been used to help distinguish chest pain as either gastrointestinal or cardiac. While it has been widely used in the treatment of dyspepsia, studies have suggested that the GI cocktail is only as effective as antacids alone.

The "GI cocktail" does not refer to a specific product. Rather, it refers to a mixture of viscous lidocaine, an antacid, and an anticholinergic. Viscous lidocaine works as an anesthetic to numb pain in the throat, esophagus, and stomach. Antacids work to neutralize stomach acid. Anticholinergics work to ease symptoms that accompany dyspepsia including nausea, vomiting, and abdominal cramping.

This drink is most commonly prepared by mixing tequila, lime juice, and a grapefruit-flavored soda such as Fresca, Squirt, or Jarritos and served with ice and a lime wedge. Adding salt to the rim of the glass is also an option.

Alternatively, the grapefruit soda can be replaced with fresh white or red grapefruit juice (jugo de toronja) and club soda (sugar optional).

A simple paloma is a two-ingredient cocktail consisting only of tequila and grapefruit-flavored soda. A more complex variant of the Paloma is the cantarito, which in addition to lime juice, also has lemon juice and orange juice.

The paloma is considered by some to be more flavorful than its closest relative, the greyhound, which consists of grapefruit juice and either gin or vodka mixed and served over ice, as the tequila present in a

paloma adds an earthy note to the drink that both gin and vodka lack.

Some assume the name of the cocktail comes from the Spanish for "dove", but others suspect the name comes from a derivation of the word pomelo, which is the Spanish for "grapefruit".
